

Press release, 13 November 2024

## **EUTELSAT GROUP STILL NOT APPLYING EUROPEAN SANCTIONS AGAINST RUSSIAN MEDIA COMPANIES**

**A NEW FRENCH LAW ON DIGITAL SECURITY ADOPTED IN MAY GIVES THE REGULATORY AUTHORITY ARCOM THE TASK OF ENSURING THAT SATELLITE OPERATORS COMPLY WITH THE SANCTIONS.**

- **The French satellite operator Eutelsat Group has still not applied sanctions against various Russian media companies sanctioned by the European Union since December 2022. Despite these sanctions, the French satellite operator continues to transmit the Russian Armed Forces' Zvezda channels and the Russian Orthodox Church's SPAS channel to Russia and the annexed territories of Ukraine.**
- **The European sanctions apply immediately and do not require any further explanation from national authorities. Eutelsat Group argues that these sanctions are unclear and that it is up to Arcom to issue instructions. Since the enactment of the new law on digital security (SREN Law) on 21 May 2024, Arcom has been responsible for ensuring that French satellite operators comply with European sanctions. Six months after the law was promulgated, it is high time that the Authority issued a formal notice to the operator to comply with its obligations.**
- **While the channel packages of its two Russian customers, NTV Plus and Triolor, have been distributed in the annexed territories of Ukraine since 2014, Eutelsat Group is not complying with Ukrainian sanctions. The NTV Plus company and 16 channels broadcast on the Eutelsat 36D satellite have been sanctioned by the Ukrainian authorities.**
- **In its *Universal Registration Document* published on 17 October 2024, Eutelsat Group does not mention sanctions against Russian companies as a risk factor, even though their implementation would affect 187 frequencies on the four satellites of its "Russian segment"**

- **Eutelsat also continues to broadcast the Lebanese channel Al Mayadeen TV, which supports the terrorist organisations of the Iranian "axis of resistance" (Hezbollah, Hamas, Palestinian Islamic Jihad) and Russian aggression in Ukraine.**

Since March 2022, the Denis Diderot Committee and its partners have been campaigning against the transmission by European telecommunications companies of Russian propaganda channels and audiovisual services of Russian media companies sanctioned by the European Union. Many European Internet companies (most Internet service providers, Google, and some hosting companies) are still not complying with the sanctions. Various European satellite operators continue to broadcast the services of sanctioned Russian media companies.

Among these operators, Eutelsat Group occupies a special place. Eutelsat Group, the world's second-largest communications satellite operator, is a company incorporated under French law, with the French State (through BPI) and the UK Government among its principal investors. The company operates under the regulatory supervision of Arcom and the French Ministry of the Economy, Finance and Industry. A former French Minister of Defence, Florence Parly, and a former Minister of Culture and Communication, Fleur Pellerin, sit on the Board of Directors. The UK Secretary of State for Science, Innovation and Technology of the United Kingdom is represented by Elena Ciallie

### ***Despite the war, Eutelsat has not called its partnerships with Russia into question***

The Russian State continues to hold a stake in Eutelsat S.A, the operating subsidiary of Eutelsat Group.

Eutelsat Group's two main customers in Russia are pay-TV platforms NTV Plus and Tri kolor, two companies with strong ties to the Kremlin regime, which market their services in Russian, but also, since 2014, in the annexed territories of Ukraine. Eutelsat therefore accepts, *de facto*, the annexation of these territories, which is contrary to international law.

Eutelsat Group is providing NTV Plus and Tri kolor with capacity on its new Eutelsat 36D satellite, launched on 30 March 2024, and is maintaining its partnership with state satellite operator RSCC, for which it manages most of the capacity on three satellites (Ekpress AT 1, Ekpress AT2 and Ekpress AMU 1).

## ***Eutelsat Group does not apply European sanctions against Russian media companies***

Eutelsat Group has applied the sanctions against channels sanctioned by Arcom and the European Union (Russia Today, RTR Planeta, Rossiya 24, Pervyi Kanal, Rossiya 1, NTV, REN-TV). This has resulted in a renegotiation of contracts with Russian partners and a loss of turnover of several million euros.

On the other hand, Eutelsat has not implemented the sanctions against the companies sanctioned by the European Union: the VGTRK and National Media Group groups, as well as the Russian Armed Forces broadcasting company Zvezda and Spas Telekanal, the Russian Orthodox Church broadcasting company.

Sanctions against these media companies have been imposed by the European Union since 16 December 2022, under Regulation 269/2014. This provides for the freezing of the assets and economic resources of the sanctioned companies. As specified by the European Commission on 14 May 2024, *"The prohibition to make economic resources available includes the prohibition to provide internet services, satellite capacities, content hosting services or any other means that could be used to obtain funds by the listed entities."*

According to statements by the Comité Diderot, based on information provided by Lyngsat.com as of 4 November 2024, Eutelsat continues to allocate 187 frequencies on the four satellites it manages for the Russian market to 34 TV channels and 5 radio channels of companies sanctioned by the European Union. This includes frequencies allocated to the two TV channels and the radio channel of Zvezda, a subsidiary of the Russian Armed Forces, and to the Spas Telekanal channel published by the Russian Orthodox Church broadcasting company.

The *2023-2024 Universal Registration Document*, published for the General Meeting of Shareholders to be held on 21 November, makes no mention of these sanctions and the financial risk that their application would represent. For fiscal year 2023-2024, Russia still accounted for 6% of Eutelsat Group revenues, or 72.5 million euros.

## ***Arcom must give formal notice to the operator to comply with European sanctions***

Eutelsat's main argument for not implementing the European sanctions is that they are not clear and that it is up to the French regulatory authority Arcom to specify which channels are affected.

The argument that the sanctions are imprecise is a weak one. The list of channels produced by the sanctioned companies is unambiguous: it is only necessary to refer to the websites of these companies, which are always accessible, to find out which channels they provide.

The excuse that Arcom had not issued any instructions is also a very weak argument. As the operator acknowledges, European sanctions are immediately applicable and do not require an implementing text from national authorities. In December 2022, the operator correctly applied the sanctions against the Iranian state-owned company IRIB,

which were of the same legal nature, without the French authorities having to produce an implementing text. Furthermore, in its Decision of 20 December 2023 giving formal notice to Eutelsat SA to cease broadcasting two Hamas channels, Arcom pointed out that *"In general, it is the responsibility of any operator of satellite networks under French jurisdiction to ensure that the application of broadcasting contracts is strictly subject to compliance by the television services carried with the rules and principles set out in legislative provisions, such as the prohibition in programmes of any incitement to hatred or violence on grounds of race, religion or nationality"*.

If the French operator is slow to apply the sanctions, French authorities have a duty of diligence. The new paragraph 2 of article 42 of the law of 30 September 1986 on freedom of communication, introduced by article 14 of the SREN law promulgated on 21 May 2024, mandates Arcom to ensure that French satellite operators comply with European sanctions. Almost six months after the law was promulgated, Arcom has still not fulfilled its role.

### ***Eutelsat Group fails to comply with Ukrainian sanctions***

The French Order of 18 January 2020 authorises Eutelsat SA to operate frequency assignments for a satellite system at the 36° East orbital position. This authorisation *"is without prejudice to the authorisations required to operate the system in the territories concerned by the service area"*.

By contrast, Eutelsat complies very well with Russian authorisations, or rather bans: since March 2022, Western news channels and Russian opposition channels have no longer been offered by the two Russian platforms NTV Plus and Trikokor on the Eutelsat 36D and Eutelsat 36C/Ekpress AMU 1 satellites.

On the other hand, Eutelsat is not complying with Ukrainian sanctions. As recognised in December 2022 by the Conseil d'Etat and Arcom, Eutelsat Group's two Russian bouquets clients, NTV Plus and Triokolor at 36° East, have been officially distributed in the occupied and annexed territories of Ukraine, since 2014. Under international law, the occupied and annexed territories are still part of Ukraine.

The operator must therefore comply with the sanctions imposed by the Ukrainian authorities. NTV Plus is one of the sanctioned companies, along with 26 channels broadcast from 36° East, including 16 on the new Eutelsat 36D satellite and 11 on the Ekspres AMU1/ Eutelsat 36C satellite.

### ***Eutelsat continues to broadcast the Lebanese channel Al Mayadeen TV, which supports Hezbollah, Hamas, Iran, Assad and Putin, as well as the anti-Semitic channels of the Houthi regime in Yemen.***

Another disturbing practice of the Eutelsat Group is the provision of frequencies to various Middle Eastern channels that promote Islamist and anti-Semitic terrorism.

Eutelsat Group broadcasts on three satellites to Europe, the Middle East and North Africa the Lebanese channel Al Mayadeen TV, which supports the terrorist forces of the "axis of resistance" as defined by Iran (Hamas, Hezbollah, Palestinian Islamic

Jihad, the Houthi regime in Yemen) and broadcasts clearly anti-Semitic content and celebrates the attack on Israeli civilians on 7 October 2023. This channel was broadcast illegally from Italy, without the licence required under Italian law and without the intervention of the Italian authority, AGCOM. AGCOM only intervened after the Diderot Committee issued an alert in November 2023. Since May 2024, the channel has no longer been broadcast from Italy, but the operator refuses to declare from which country the uplink is made, information that is essential to establish which European State has jurisdiction over this channel.

Eutelsat also continues to transmit several channels of the Houthi regime in Yemen, including the Al-Masirah channel, which explicitly advocates the destruction of Israel and justifies terrorist attacks against the merchant fleet in the Red Sea.

Al Mayadeen TV and the Houthi channels are not currently subject to European or national sanctions, but the responsibility of the French operator in their transmission is questionable given the explicit calls for hatred and terrorist action.

In the absence of information provided by the operator, it is up to the French authorities to establish public transparency on the countries in which these channels are uplinked.

**CALL TO DEMONSTRATE ON THE OCCASION OF THE EUTELSAT GROUP  
SHAREHOLDERS' MEETING**

***in front of the ACCOR SEQUANA Tower, 82 rue Henri Farman, 92130 Issy-les-Moulineaux, 21 November 2024 from 1.15 pm to 2.30 pm***

***An Event scheduled for 21 November 2024 to coincide with the Annual General Meeting***

The Diderot Committee and its partners (Union des Ukrainiens de France, Russie-Liberté, association Pour l'Ukraine, pour liberté et la nôtre, Alliance des femmes pour la démocratie) will be holding a demonstration in front of the Accor Tower in Issy les Moulineaux on the occasion of the Eutelsat Group's Annual General Meeting on 21 November from 1.15 pm to 2.30 pm. The demonstration will once again call on the operator to fulfil its responsibilities, and on Arcom to give the operator formal notice to comply with European and Ukrainian sanctions.

**For further information, contact André Lange, Diderot Committee coordinator, tel. 06.08.74.50.12 [comite.denisdiderot@gmail.com](mailto:comite.denisdiderot@gmail.com)**

**Channels of Russian media companies sanctioned by the European Union broadcast by the Eutelsat fleet (as at 31 October 2024, according to Lyngsat.com)**
